Tran Tien Dat

Route 80, Tan Hiep, Kien Giang 91000 Vietnam ▪ +84 388 470 365 ▪ tiendattran.gm@gmail.com

Professionnal Summary

- Hardworking college student trained in computer science and software development. Looks for opportunities to contribute to project success and learns new procedures quickly. Enthusiastic about building deeper understanding of computer application structure and practical programming abilities.
- Motivated Software Developer focused on expanding from classroom training to real-world environments. Brings basic understanding of design, development, and testing requiements for applications. Detail-oriented in checking code and troubleshooting problems.

Skills

- Web design
- Application programming
- Game development
- Debug software
- Project support

Experience

Intern Web Developer, 06/ 2021 to 11 /2021
Mekong Tech – Rach Gia, Kien Giang, Vietnam

- Worked closely with development team to implement coding changes and troubleshoot bugs.
- Documented and tested new software functionality in support of development process.
- Build APIs, libraries, and tools to power engineers and operations.
- Worked with engineering teams to define project scope and understand planning process.

Education

Diploma: Information Technology, Apr 2022
Kien Giang College – Rach Gia, Tan Hiep, Vietnam
I attended college for two and a half years. Here I learned the basics of programing and software development, discovered my passion for programming, the fascinating logic behind computer and application systems. It was here I found that I actually good at building software. I also got a scholarship for being the top of my class.
